90-Day Mini-Guide

# From Fitness Center to Performance Hub

## What Your Workforce Gains In 90 Days

Exos takes your fitness center from unused square footage to a place where employees build energy, focus and resilience. This guide shows what that transformation looks like, and exactly what you walk away with at every stage.

### Two ways to begin. One performance strategy.

1. Elevate an existing center, live in 90 days
2. Lock in the strategy and design direction for a new or renovated space, so you build it right the first time

## The Opportunity

# A fitness center is a place.
# A performance hub is a strategy.

More equipment and more classes will not move the numbers your leadership cares about.
A coach-led experience designed around what your employees actually need will.
Here is what changes for your people:

### What a traditional fitness center offers

1. Space, equipment, and a class schedule
2. One-size-fits-most programming
3. Success measured in visits
4. Self-guided programs

### What your employees get from Performance Hub

1. A coach and a personal gameplan
2. Support across movement, mindset, nutrition, and recovery
3. Success measured in engagement and outcomes you can report
4. Programming shaped by your workforce data

## The Exos Difference

**MOVEMENT** | **MINDSET** | **NUTRITION** | **RECOVERY**

Every recommendation, from equipment placement to the member journey, connects back to a business or workforce objective you have defined. Exos meets your organization where it is, then prioritizes the changes most likely to improve participation, energy, focus, resilience, and belonging.

**THE PRINCIPLE**

Start with the outcome your business needs. Design the experience around it.
Measure, learn, and keep improving.

## A Plan Built Around Your Starting Point

# Two on-ramps. One destination.

Your roadmap depends on where you are today. Either way, you get a clear plan, a single owner, and visible momentum inside 90 days.

PATH 1

### Elevate an existing center

A true 90-day transformation

1. Clarity on the workforce and business outcomes that matter
2. An honest read on your space, services, demand, and barriers
3. The changes most likely to move participation, prioritized first
4. A trained team, ready systems, and a launch plan
5. A performance hub that stabilizes fast and improves every cycle

**You walk away with:** a transformed center, live in 90 days

PATH 2

### Design or substantially renovate

The first 90 days of a longer journey

1. A shared definition of goals, population, and project realities
2. A program and space sized by data, not guesswork
3. Experience principles and functional zones your designers can build from
4. Equipment, budget, and procurement direction you can defend
5. A complete plan for design, construction, and operations

**You walk away with:** a build-ready strategy that prevents expensive rework

## What Remains Constant

**ONE OWNER**

A dedicated Exos project manager runs the work end to end, so your team does not have to.

**MEMBER-FIRST**

Employees keep access, continuity, and confidence through every change.

**BUILT AROUND YOU**

The roadmap flexes to your priorities, stakeholders, and readiness.

**Note:** A full new build typically extends beyond 90 days. Exos uses the first 90 days to establish the strategic and technical foundation that keeps the rest of the project on track.

## Path 1: Existing Center

# Your 90-day transformation roadmap

Not a prescriptive checklist. Timing and activities are tailored to your workforce, dependencies and priorities.

**DAYS 0–30**

### Know exactly where you stand

1. Goals, decision-makers, and success measures confirmed with your leadership
2. Members and non-members heard, so you know who you are missing and why
3. Space, equipment, accessibility, staffing, systems, and transition needs assessed
4. Quick wins separated from longer-term opportunities

**You get:**
A shared success plan and a prioritized roadmap

**DAYS 31–60**

### Watch it come together

1. A member journey and program strategy designed around your population
2. Operations, technology, compliance, and site requirements handled
3. Staff hired or transitioned, and trained in the Exos methodology
4. Launch communications and a targeted enrollment plan ready to go

**You get:**
A launch-ready experience and a trained team

**DAYS 61–90**

### See it working

1. The refreshed experience live, with tours, consultations, programming, and campaigns
2. Real-world friction resolved fast while operations stabilize
3. Enrollment, participation, satisfaction, and early outcome signals tracked
4. Insights reviewed with stakeholders and the next optimization cycle set

**You get:**
A live performance hub and your first optimization plan

**PLAN AHEAD FOR**

Information security reviews, background checks, incumbent access, internal approvals, and technology integrations.

## Path 2: Design Or Substantial Renovation

# Your first 90 days of design and development

For a new build or major renovation, these 90 days give you the decisions, design direction, and roadmap that keep the longer journey on schedule and on budget.

**DAYS 0–30**

### Know what you are building, and why

1. Project vision, population needs, goals, roles, budget, and schedule confirmed
2. Site conditions, existing plans, amenities, and accessibility needs reviewed
3. Utilization, membership, peak-load, and fixture projections gathered

**You get:**
A project brief and a decision framework

**DAYS 31–60**

### See the space take shape

1. A program right-sized with Exos data and the space calculator, not guesswork
2. Functional zones, adjacencies, flow, and experience principles defined
3. Design standards, space blocks, test-fit concepts, and infrastructure inputs developed

**You get:**
A right-sized concept and stakeholder alignment

**DAYS 61–90**

### Leave with a plan you can defend

1. Equipment strategy, preliminary pricing, procurement, and installation needs established
2. Long lead items, construction coordination points, and operating requirements identified
3. A next stage roadmap from design through opening and operational handoff

**You get:**
An approved direction and your next stage roadmap

**USER-CENTRIC**
Welcoming and useful for every experience level, so nobody feels out of place.

**OPERATIONAL INSIGHTS**
Sizing and flow informed by data and real-world operations.

**SAFETY + ACCESSIBILITY**
ADA, spacing, and usability planned from the start, not retrofitted.

**LATEST + GREATEST**
Current equipment and amenities that keep engagement high over time.

A full new build extends beyond 90 days. These first 90 give you the direction, numbers, and roadmap that keep design, approvals, construction, and equipment lead times on track.

## From Activity To Impact

# Walk into leadership meetings with proof, and roadmap.

Visits are only the first signal. Your measurement plan is built before launch, so from day one you can show engagement, behavior change, and the workforce outcomes leaders care about.

**1 REACH**

Enrollment, awareness, new members

**2 ENGAGEMENT**

Active participation, repeat use, service mix

**3 EXPERIENCE**

Satisfaction, belonging, coaching connection

**4 OUTCOMES**

Energy, focus, resilience, work performance

## Proof That Experience Translates To Impact

**83%**

of members report higher work performance

**90%**

saw improvement in overall quality of life

**100%**

of surveyed clients rate the Exos implementation team excellent

## Your First 90-Day Scorecard

| | | | | |
|---|---|---|---|---|
| BASELINE ESTABLISHED | TARGET AUDIENCES AGREED UPON | LEADING INDICATORS LIVE | FEEDBACK LOOP ESTABLISHED | NEXT-QUARTER PRIORITIES AGREED |

Final measures are agreed with you during consultation and alignment. Sources: Exos member survey reporting; Exos implementation client survey and internal program data.

Your Next Move

# One conversation. Five things you leave with.

No pitch deck and no obligation. In one working session, the Exos team maps this roadmap to your center, your workforce, and your constraints. You leave with:

1. **Clarity on the outcomes** your center should influence, in your leadership's language
2. **A picture of who you are reaching today** and who you are missing
3. **What employees could do and feel differently** within 90 days
4. **Which operational, space, or technology constraints** actually matter, and which do not
5. **A shared definition of meaningful progress** you can take back to leadership

**100% of surveyed clients rate the Exos implementation team excellent**
